

LARGE ULTRA THIN QLED DISPLAY

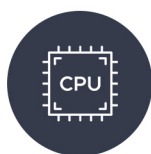

Powerful digital signage solution with an ultra slim (23mm) design with a narrow bezel (7.9mm) QLED display, which supports 4K 60FPS. The configuration of the screen, choosing the display layout, configuring the elevator information (including arrows, fonts, colours, etc.), and uploading contents can all be done online. The screens can be operated both in an offline mode (updates by a secured USB stick) or in an online mode (remotely management).

KEY FEATURES

Ultra Slim Design
(23mm) with narrow
bezel (7.9mm)

Powerful CPU
(Quad-core)

Industrial Design
(Metal Box)

**Wide viewing angle (178
degree), high brightness,
anti-reflection**
